

## Intervals is ideal for...

- Web design and development agencies
- Creative agencies
- PR and marketing firms
- IT service companies
- Start-ups and software developers
- Departments within larger companies

**“Intervals takes the pain out of running your business.”**

— Matt Dandurand @ Media Contour

**“We were able to dump our two separate time tracking and issue tracking systems for one system that does both jobs better.”**

— Andrew Embler @ Concrete Websites

## Online Time, Task & Project Management

Intervals is a web-based project management application that marries time tracking and task management in a collaborative online space with powerful reporting.

### Unlimited users on all plans

## Benefits of using Intervals

- Keep project scope and budget under control
- Increase revenue — bill more hours
- Get started right away — easy to implement, no software to install
- Track your time and tasks more efficiently and accurately
- Invoice early and often, and get paid quicker
- Centralize your team and processes
- Spend more time working and less time managing projects
- International friendly — Intervals is used in over 100 countries and supports over 60 international locales

**“Intervals has quickly become the backbone of our business and thanks to it we are running smoother than we ever thought possible!”**

— Sam Hembury @ Evado Media
